 Kandivali (west), Mumbai

ABOUT ME

Computer Engineering student skilled in Java , C and C++ with projects in health sector.

Learning MySQL (database) and DSA, eager to apply knowledge through internships , open source contribution (GSOC) and real-world projects.

EDUCATION

B.Tech in Computer Engineering

Vidyalankar Institute of Technology, Mumbai
2024 – Present

HSC

Nirmala Memorial Foundation College
of Commerce & Science
2022 – 2024

SKILLS

Hard Skills

- Java , C , C++ Programming
- Python
- Web Dev
- MySQL (Learning)
- Data Structures & Algorithms (Striver's DSA)
- OOP Concepts

Soft Skills

- Problem-Solving
- Team Collaboration
- Time Management
- Quick Learning
- Leadership

LANGUAGE

- English(Fluent)
- Hindi (Intermediate)
- Marathi(Native)

PROJECTS

1. SmartBuy – Online Shopping System (Node.js, Express, SQLite3) – In Development

- Building backend APIs for cart, checkout, and authentication
- Designing database with SQLite3 for product and user management
- Implementing modular routes and middleware for clean project structure
- used my experience of clone of Amazon and Netflix

2. Health Emergency App – Java – In Development

- The app helps accident victims by letting users select their city, describe the patient's condition, and view nearby hospitals on a radar-style map.
- It guides users with either GPS directions if they can drive or provides ambulance contact numbers if they cannot.
- Finally, it notifies the selected hospital's staff to prepare immediately for emergency treatment.

3. Spotify playlist – C

- Allows you to create your own playlist
- It has option to like and loop songs
- Shows you the stats of each song

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Java Programming
- MATLAB Fundamentals + Advanced Modules
- Achieved 9.6 CGPI in First year (B.Tech)
- Consistent academic performance: 95.2% (SSC), 87% (HSC)
